

Acceptance Testing

UAT Execution & Report Submission

Date	20 August 2026
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the ServiceNow-Based Employee Laptop Request Application at the time of release to User Acceptance Testing (UAT). The application manages employee laptop requests, manager approval, role-based access, duplicate-request validation, request status and notifications.

2. Defect Analysis

At the time this report was prepared, UAT execution was pending; therefore no defects are recorded as resolved or closed.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

A total of 15 UAT cases are planned for this report.

Section	Total Cases	Not Tested	Fail	Pass
Employee Request Form	5	5	0	0
Approval Workflow	4	4	0	0
Security and ACL	3	3	0	0
Notifications	2	2	0	0
Business Rule	1	1	0	0
Total	15	15	0	0

4. UAT Status and Open Issues

UAT execution is pending. Test cases must be executed in the ServiceNow Zurich environment before final Pass/Fail results are recorded. Any discovered defects should include severity, status and reproduction steps.

5. Project-Specific Coverage

- Employee laptop request creation and mandatory-field validation.
- Manager assignment and approval/rejection workflow.
- Duplicate-request prevention within the current calendar year.
- Role-based access through it_employee and it_manager ACLs.
- Approval and final-status email notifications.
- Request lifecycle from creation through Approved or Rejected.

6. Final UAT Recommendation

The application can proceed to final acceptance after all planned UAT cases are executed, critical/high defects are resolved or formally accepted, and the project owner confirms the expected workflow, security and notification behavior.
